To the Board of directors and shareholders of  
**Braskem S.A.**  
Camaçari – Bahia

## Introduction

We have reviewed the accompanying individual and consolidated interim financial information of Braskem S.A. (the Company), comprised in the Quarterly Information Form for the quarter ended March 31, 2021, comprising the balance sheet as of March 31, 2021 and the respective statements of income, of comprehensive income, of changes in shareholders' equity and of cash flows for the period of three months then ended, including the footnotes.

Management is responsible for the preparation of the individual interim financial information in accordance with the NBC TG 21 – Interim Financial Reporting and of the consolidated interim financial information in accordance with the NBC TG 21 and with the international standard IAS 34 – Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB), such as for the presentation of these information in accordance with the standards issued by the Brazilian Exchange Securities Commission, applicable to the preparation of interim financial information. Our responsibility is to express a conclusion on this interim financial information based on our review.

## Review scope

We conducted our review in accordance with the Brazilian and International standards on reviews of interim information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). The review of interim information consists of making inquiries, primarily of persons responsible for the financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the audit standards and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the individual interim financial information included in the quarterly information form referred to above has not been prepared, in all material respects, in accordance with NBC TG 21 applicable to the preparation of interim financial information, and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

## Conclusion on the consolidated interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the consolidated interim financial information included in the quarterly information form referred to above has not been prepared, in all material respects, in accordance with NBC TG 21 and IAS 34 applicable to the preparation of interim financial information, and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

## Emphases of matter

### Investigation in progress - Braskem Idesa

We draw attention to Note No.9(d) to the individual and consolidated interim financial information, which states that the Company engaged an independent US law firm, in order to conduct an internal investigation, due to allegations of undue payments related to the Project "Ethylene XXI". The information was originally delivered by Mexico news media and included in the testimony of Pemex's former CEO to the General Attorney of Mexico. The investigation is under way and, to date, the Company is not able to estimate when it will be completed. Our review conclusion is not modified with respect to this matter.

### Class action

We draw attention to Note No.22.3 to the individual and consolidated interim financial information, which describes that a class action lawsuit has been filed in the United States District Court for the District of New Jersey against the Company and some of its current and former executive officers under the U.S. Securities Exchange Act of 1934 and its rules. The proceeding is at its initial stage and, on January 15, 2021, the court appointed two plaintiffs to act as the lead plaintiffs in said class action lawsuit. The Company have engaged legal advisors for its defense in that country. Our review conclusion is not modified with respect to this matter.

## Other matters

### Statements of value added

The quarterly information referred to above includes the individual and consolidated statements of value added for the period of three months ended March 31, 2021, prepared under the responsibility of the Company's management and presented as supplementary information for the purposes of IAS 34.

These statements were submitted to the same review procedures in conjunction with the review of the Company's interim financial information in order to conclude they are reconciliated to the interim financial information and to the accounting records, as applicable, and whether the structure and content are in accordance with the criteria established in the NBC TG 09 - Statement of Value Added. Based on our review, nothing has come to our attention that causes us to believe that the accompanying statements of value added were not prepared, in all material respects, in accordance with the individual and consolidated interim financial information taken as a whole.

## **Braskem S.A.**

### **Management notes to the parent company and consolidated quarterly information at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

## **1 Operations**

Braskem S.A. (“Parent Company” or Braskem) is a public corporation headquartered in Camaçari, Bahia (“BA”), which, jointly with its subsidiaries (“Company”), is controlled by Novonor S.A., which directly and indirectly holds interests of 50.11% and 38.32% in its voting and total capital, respectively. The Braskem’s shares are traded on B3 S.A. Brasil, Bolsa, Balcão (“B3”), under the tickers BRKM3, BRKM5 and BRKM6, and on the New York Stock Exchange (“NYSE”) under the ticker BAK.

Braskem also is engaged in the manufacture, sale, import and export of chemicals, petrochemicals and fuels, the production, supply and sale of utilities such as steam, water, compressed air and industrial gases, as well as the provision of industrial services and the production, supply and sale of electric energy for its own use and use by other companies. Braskem also invests in other companies, either as equity method investees or associates.

The Company has industrial plants in Brazil, the United States, Germany and Mexico. The units produce thermoplastic resins, namely polyethylene (“PE”) and polypropylene (“PP”), polyvinyl chloride (“PVC”), as well as basic petrochemicals.

## **2 Accounting policies**

Accounting practices from the prior year were applied consistently in the preparation of this quarterly information.

### **2.1 Basis of preparation and presentation of the quarterly information**

This quarterly information for the three months ended March 31, 2021 have been prepared in accordance with CPC 21(R1) “*Demonstração Intermediária*” as issued by the Brazilian Accounting Pronouncements Committee (CPC) and released by the Brazilian Securities and Exchange Commission (*Comissão de Valores Mobiliários - CVM*), and with IAS 34 “Interim Financial Information” as issued by the International Accounting Standards Board (IASB). It should be read together with the Company’s audited financial statements for the year ended December 31, 2020, which include the full set of notes.

In preparing this quarterly information, Management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Company’s accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements.

The issue of this quarterly financial information was authorized by the Executive Board on May 05, 2021.

## Braskem S.A.

### Management notes to the parent company and consolidated quarterly information at March 31, 2021

All amounts in thousands, except as otherwise stated

## 2.2 Functional and foreign currency

### (a) Functional and presentation currency

The functional currency of the Company is the Real (R\$). The presentation currency is also Real (R\$). All amounts have been rounded to the nearest thousand, unless otherwise indicated.

### (b) Functional currency other than Real

The subsidiaries with a functional currency different from that of the Parent Company are listed below:

	<u>Functional currency</u>
<b>Subsidiaries</b>	
Braskem Alemanha	Euro
BM Insurance, Braskem America, Braskem America Finance, Braskem Holanda, Braskem Holanda Finance, Braskem Holanda Inc. and Braskem México Sofom	U.S.dollar
Braskem Idesa, Braskem Idesa Serviços, Braskem México and Braskem México Serviços	Mexican peso
Braskem Argentina	Argentinean peso
Braskem Chile	Chilenean peso
Braskem India	Rupee

### (c) Exchange variation effects

The effects from exchange variation on the Company's transactions are mainly due to the variations in the following currencies:

	<u>End of period rate</u>			<u>Average rate</u>		
	<u>Mar/2021</u>	<u>Dec/2020</u>	<u>Variation</u>	<u>Mar/2021</u>	<u>Mar/2020</u>	<u>Variation</u>
U.S. dollar - Brazilian real	5.6973	5.1967	9.63%	5.4833	4.4657	22.79%
Euro - Brazilian real	6.6915	6.3779	4.92%	6.6033	4.9225	34.15%
Mexican peso - Brazilian real	0.2787	0.2610	6.78%	0.2693	0.2230	20.77%
U.S. dollar - Mexican peso	20.4461	19.9240	2.62%	20.3665	20.0820	1.42%
U.S. dollar - Euro	0.8491	0.8166	3.98%	0.8299	0.9071	-8.51%

## 2.3 New standards and interpretation not yet effective

A series of new standards came into effect for fiscal years starting after January 1, 2021. The Company did not adopt these standards in the preparation of this quarterly information. The following new or amended standards are not expected to have a significant impact on the Company's parent company and consolidated financial statements:

- Onerous Contracts: costs of fulfilling a contract (amendments to CPC 25/IAS 37).
- Property, Plant and Equipment: revenue before the intended use (amendments to CPC 27/IAS 16).
- Reference to the Conceptual Framework (amendments to CPC 15/IFRS 3).
- Classification of Liabilities as Current or Non-Current (amendments to CPC 26/IAS 1).

### - Interest Rate Benchmark Reform – Phase 2 (amendments to CPC48/IFRS 9, CPC 38/IAS 39, CPC 40/IFRS 7, CPC 11/IFRS 4 and CPC 06/IFRS 16)

The changes address issues that might affect financial reporting after the reform of an interbank offered rate (IBORs), including the effects of changes to contractual cash flows or hedging relationships arising from the replacement of an interest rate benchmark with an alternative benchmark rate. The amendments provide a

**Management notes to the parent company and consolidated quarterly information at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

practical expedient for certain requirements under CPC 48/IFRS 9, CPC 38/IAS 39, CPC 40/IFRS 7, CPC 11/IFRS 4 and CPC 06/IFRS 16 relating to:

- changes in the basis for determining contractual cash flows of financial assets, financial liabilities and lease liabilities; and
- hedge Accounting.

*(i) Change in the basis for determining contractual cash flows*

The changes require adjustments to the determination of cash flows from financial assets and financial liabilities affected by the interest rate benchmark reform.

On March 31, 2021, the Company has bank loans whose interest rates are based on LIBOR, as disclosed in Note 14, and consequently will be subject to IBOR reform. The Company expects that the benchmark interest rate of these loans will be changed to the Security Overnight Financing Rate (SOFR) by 2023.

*(ii) Hedge accounting*

The changes provide an exception from the requirements of hedge accounting in the following areas;

- Permit the change in the designation of a hedging relationship to reflect the changes required by the reform.
- When a hedged item in a cash flow hedge is amended to reflect the changes required by the reform, the amount accumulated in the cash flow hedge reserve is deemed to be based on the alternative benchmark interest rate applied to the hedged item.

At March 31, 2021, the Company had cash flow hedges based on LIBOR. The Company expects that indexation of the hedged item and hedging instruments to LIBOR will be replaced by SOFR by the end of 2021. With this replacement, the Company expects to apply the changes relating to hedge accounting. However, there are uncertainties as to how and when the change in benchmarks will occur. The Group does not expect the amounts accumulated in the cash flow hedge reserve to be reclassified immediately to the profit or loss due to the IBOR transition.

*(iii) Disclosures*

The amendments will require the Company to disclose additional information on the entity's exposure to risks arising from the interest rate benchmark reform and the related risk management activities.

*(iv) Transition*

The Company is monitoring and evaluating the application of changes during 2021 as the new rate begins to have practical effects.

## 2.4 Main measures and impacts due to COVID-19

Braskem has been closely monitoring the impacts from the COVID-19 pandemic on its business and surrounding communities. In 2020, Braskem has formed a crisis committee to establish global procedures focusing mainly on the health and safety of people and the continuity of its operations. The main actions taken by the Company are:

- (i) Determining that all team members and contractors from the group vulnerable to COVID-19 work remotely until the last phase of return;
- (ii) Determining that all team members and contractors not directly related to the safe continuity of operations work remotely until the criteria for the start of flexible measures for a safe return are met;
- (iii) Reducing the number of team members and contractors working on its industrial assets, with operations using the smallest possible teams, while considering all rules for ensuring personal safety and maintaining operational reliability;
- (iv) Restricting visits by non-routine third parties and suppliers to Braskem's facilities;
- (v) Creating agendas jointly with clients and local communities to verify if there are products in its portfolio to help combat the pandemic;
- (vi) Creating, implementing and monitoring the indicators of the Plan for Safe Return to Braskem plants and offices.

**Management notes to the parent company and consolidated quarterly information at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

During 2020, the Company adopted cash-preservation actions to ensure the financial stability and resilience of its business, which include:

- Drawing down a revolving credit facility in the amount of US\$1 billion in April 2020, which comes due in 2023. At the end of July, the Company prepaid the facility in full, in an amount corresponding to R\$5.5 billion;
- Issue of bonds in the international market by the subsidiary Braskem Holanda, in July 2020, in the amount of US\$600 million (R\$3.2 billion);
- Reducing fixed costs by approximately 9% compared to the same period of 2019;
- Reducing the investments planned for 2020 from US\$721 million (R\$3.9 billion) to US\$555 million (R\$2.8 billion);
- Postponing the payment of social contribution charges in Brazil; and
- Optimizing working capital.

In the first quarter of 2021, the demand for resins and chemicals remained at a strong level and the utilization rate of Brazil's petrochemical plants was 82%, in line with the last quarter of 2020, even with the impact caused by a fast scheduled shutdown at the petrochemical plant located in Rio Grande do Sul.

The utilization rate of European plants was 93%. Given the severe winter on the Gulf Coast that affected petrochemical production in such region, the US utilization rate was 78%, lower than the last quarter of 2020.

Finally, the Mexican utilization rate was 58% due to production based on an experimental business model in January and February. This model became necessary after the unilateral suspension of natural gas transportation by Cenagas at the beginning of December 2020. In early March 2021, after the Braskem Idesa signed a Memorandum of Understanding with PEMEX and Cenagas, the natural gas transportation service was re-established.

The Company also highlights the actions carried out jointly with its clients and partner companies to transform chemicals and plastic resins into items that are essential for combatting COVID-19, which include surgical masks, packaging for liquid and gel alcohol, bleach and 3D printing of bands for protective face shields; donations of LPG (cooking gas) to field hospitals; actions to support the chain of clients and suppliers, particularly small and midsized companies; and donations of hygiene kits and food staples to local communities.

In accordance with the guidance of the Securities and Exchange Commission of Brazil ("CVM"), the Company's Management reviewed the accounting estimates for the realization of assets, including the estimates for losses on trade accounts receivables, inventory impairment loss, deferred tax assets and other assets, or those related to the provision for liabilities in the Quarterly Information given the significant changes in the risks to which the company is exposed (see more information in note 20.6). The review considered events after the reporting period that occurred up to the reporting date of this quarterly information, and no significant effects were identified that should be reflected in the consolidated and parent company quarterly information for the period ended March 31, 2021.

Due to the uncertainties arising from the COVID-19 pandemic with regard to the global economy, it is impossible to accurately predict the adverse impacts on the equity and financial position of the Company and its subsidiaries after the reporting date. With the recovery in demand for resins, the Company has no expectations of additional provisions for impairment testing of its assets in the near future arising from a scenario of demand constraints.

**5 Trade accounts receivable**

The accounting policies of trade accounts receivable as disclosed in the 2020 annual financial statements of the Company, in Note 7.

The Company's average receivables term is generally 30 days; therefore, the amount of the trade accounts receivable corresponds to their fair value. The Company realizes part of its trade accounts receivable through the sale of trade notes to funds and financial institutions that acquire receivables.

These operations are not entitled to recourse and the risks and benefits over the receivables are substantially transferred, for which reason the trade notes are derecognized. At March 31, 2021, the total amount of the trade accounts receivables negotiated was R\$2.1 billion in the Parent Company and Consolidated (R\$1.2 billion and R\$2 billion, respectively, on December 31, 2020), with interest expense of R\$16 million in the Parent Company and Consolidated, recorded under Financial Expenses.

#### (c) New and/or renewed agreements with related companies

In the period ended March 31, 2021, the main transactions with related parties are as follows:

- (i) In December 2020, the Company entered into a sale agreement with Petrobras for up to 2 million tons of petrochemical naphtha per year, to be delivered, until December 31, 2025, to Braskem's industrial unit in São Paulo. This agreement is effective from December 23, 2020 to December 31, 2025. In the period, the transactions amounted to R\$1,175,077.
- (ii) In January 2021, the Company entered into an agreement with Transpetro involving the provision of services to Braskem, namely tanker vessel unloading in the Madre de Deus Waterway Terminal ("TEMADRE"), tank storage, product transportation via the pipeline "ORMADRE" that connects TEMADRE to the Landulfo Alves de Mararipe Refinery ("RLAM"), and the transportation of naphtha via pipeline from TEMADRE to the facilities of the carrier located in the municipality of Camaçari/BA. The duration of the agreement is from February 1, 2021 to December 31, 2025, and the total estimated amount of the agreement is R\$203,314. In the period, the transactions amounted to R\$4,831.
- (iii) In March 2021, the Company executed an amendment to extend the agreement with Petrocoque to acquire steam by Polyethylene units. This amendment, summed to the total amount of the original agreement endorsed in September 2009, amounts to R\$433 million and is valid until March 2024. In the period, these acquisitions totaled R\$4,740 (R\$9,983 on March 31, 2020).
- (iv) In March 2021, the Company agreed with Companhia de Gás do Estado do Rio Grande do Sul ("Sulgás") to acquire 200,000 m<sup>3</sup>/day of natural gas, via local gas distribution pipeline. This agreement is effective from January 22, 2021 to December 31, 2021. The maximum amount of the agreement is R\$130,928. In the period, the transactions amounted to R\$27,665.

**(a) Federal tax credits**

The main tax credit refers to the exclusion of ICMS from the PIS/COFINS calculation basis. The oldest period retroactive to 1991. During the first quarter of 2021, the final and unappealable decisions of proceedings originally filed by merged companies were certified.

The Company assessed the effects of such decisions and the total of R\$1,231,548 (R\$438,044 in 2020) was recognized related to PIS and COFINS taxes overpaid, with R\$557,897 recorded under "Other operating income (expenses)" and R\$673,651 under Financial income. The balance on March 31, 2021 is R\$1,473,221, recorded under current assets.

The Company has other lawsuits related to other acquired companies discussing the same tax matter, for which there was no final judgment (Note 22.4).

#### (d) Impact on the consolidation of Braskem Idesa

The Company is presenting the financial information of the subsidiary in which the non-controlling shareholder holds interest, and the material effects on the Company's consolidated statements.

In light of the allegations of undue payments related to the Ethylene XXI project, which were originally published in the media in Mexico and were included in the testimony by the former CEO of PEMEX to the Office of the Attorney General of Mexico ("Allegations"), Braskem S.A., together with Braskem Idesa, in compliance with the standards established by Braskem's Global Compliance System Policy and Braskem Idesa's governance guidelines, approved the hiring of an U.S. law firm with proven experience in similar cases to conduct an independent internal investigation of the Allegations ("Investigation").

The investigation is ongoing. At the moment, the Company cannot estimate the date of it, nor the outcome or impacts, if any, on the quarterly information. No issues that could impact or require additional disclosures to the quarterly information were identified so far. If the Investigation finds evidence to support any of the Allegations, such findings could affect the Company's business, reputation, financial condition, controls and operating results, as well as the liquidity and price of the securities issued by it.

- (i) The Company has payment agreements with financial institutions that allow certain suppliers to opt for granting their receivables from the Company upon accepting of financial institutions by acquiring or not the related receivables, without the Company's interference. The grant operation does not imply any change in the instruments issued by suppliers, with the same conditions of the original amount and the payment term maintained.
- (ii) Considers R\$7 billion (R\$4.7 billion in 2020) in raw material purchases due in up to 360 days for which the Company provides letters of credit issued by financial institutions that indicate the suppliers as beneficiaries.
- (iii) The rate for calculating the Present Value Adjustment (PVA) applied to the external market payments with terms equal to or longer than 90 days is calculated based on the average rate for lengthening the term of trade payables.

<b>Total</b>					<b>13,147,515</b>	<b>12,059,238</b>

- (i) Partial prepayment of US\$10,630.
- (ii) Partial prepayment of US\$9,111.
- (iii) Partial prepayment of US\$13,212.

In line with the Company's Financial Policy, the investment in the Braskem Idesa petrochemical complex was financed under a Project Finance model, under which the construction loan is paid exclusively using the cash generated by the Braskem Idesa itself and the shareholders provide limited guarantees. This financing includes the guarantees typical to Project Finance transactions, such as assets, receivables, cash generation and other rights of Braskem Idesa. The financing also contains various other covenants typical to contracts of this kind.

At March 31, 2021, certain non-monetary obligation established in the contracts remained unfulfilled. As a result, the entire balance of non-current liabilities, in the amount of R\$7,063,551, was reclassified to current liabilities, in accordance with CPC 26(R1) "Apresentação das Demonstrações Contábeis" and IAS 1 "Presentation of Financial Statements".

In accordance with the aforementioned accounting standards, reclassification is required in situations in which the breach of certain contractual obligations entitles creditors to request from Braskem Idesa the prepayment of obligations in the short term. In this context, note that none of the creditors requested said prepayment of obligations and that Braskem Idesa has been settling its debt service obligations in accordance with their original maturity schedule.

Furthermore, Braskem Idesa has been negotiating the approval of such breaches with its creditors to reclassify the entire amount reclassified from current liabilities back to non-current liabilities.

The following amortization schedule presents the long-term maturities, considering the contractual obligations mentioned above, as well as the original maturities.

## Braskem S.A.

### Management notes to the parent company and consolidated financial statements at March 31, 2021

### (a) Hedge accounting transactions

#### (a.i) Dollar call and put option

On March 31, 2021, Braskem held a total notional amount of put options of R\$2.21 billion, with an average strike price of 4.49 R\$/US\$. Simultaneously, the Company also held a total notional amount of call options of R\$1.58 billion, with an average strike price of R\$/US\$6.28. The operations have a maximum term of 24 months.

Dollar-denominated future sales in Brazilian Real were designated for hedge accounting, with the months of revenue recognition always coinciding with the months of the options. The future elements of forward exchange contracts are excluded from the designation of hedge instrument and are separately recorded as hedging cost, which is recognized under shareholders' equity in other comprehensive income.

Identification	Operation characteristics		Accumulated OCI (equity)		
	Principal exposure	Derivatives	Extrinsic value	Intrinsic value	Fair value
Dollar call and put option	Real	Dollar	189,053	251,996	441,049

#### (a.ii) Dollar Swap

In 2018, the Company contracted foreign exchange derivative operations ("swaps") in the aggregate amount of R\$1.27 billion, with annual maturities over the following 5 years starting January 2019. The amount payable in January 2020 was subject to the variation in the IPCA index. The remaining maturities are subject to the variation in the CDI. These operations were designated to cash flow hedge accounting, where the hedging instruments are foreign exchange derivatives and the hedged objects are highly probable future revenues in the domestic market subject to fluctuations in Brazilian Real/U.S. dollar price. Accordingly, the mark-to-market adjustment of the effective portion of the hedge will be recognized under shareholders equity in the line "Other comprehensive

All amounts in thousands, except as otherwise stated

income” and will be recognized in the financial result only upon the maturity of each installment. The future elements of forward exchange contracts are excluded from designation of hedge instrument and are separately recorded as hedging cost, which is recognized under shareholders' equity in the hedge cost reserve.

**(a.iii) Hedge operation by the subsidiary Braskem Idesa related to Project Finance**

**Interest rate swap linked to Libor**

<b>Identification</b>	<b>Nominal value US\$</b>	<b>Hedge (interest rate per year)</b>	<b>Maturity</b>	<b>Fair value, net</b>	
				<b>Mar/2021</b>	<b>Dec/2020</b>
Swap Libor I to VI	593,511	1.9825%	Aug-2025	126,832	155,775
<b>Total</b>	<b>593,511</b>			<b>126,832</b>	<b>155,775</b>
<b>Derivatives</b>					
Non-Current assets				(7)	
Current liabilities				55,924	53,838
Non-Current liabilities				70,915	101,937
<b>Total</b>				<b>126,832</b>	<b>155,775</b>

Braskem Idesa contracted swap operations with the purpose of offsetting part of the Libor variation arising from the financings mentioned in Note 15. This hedge operation shares the same guarantees with the Project Finance.

**18.3 Non-derivative financial liabilities designated to hedge accounting**

**(a.i) Future exports in U.S. dollars**

At March 31, 2021, the exports that were designated not yet realized and not discontinued are shown below:

	<b>Total nominal value US\$</b>
2021	186,000
2023	200,000
2024	688,854
2025	800,000
2028	1,250,000
2030	800,000
2031	800,000

### Management notes to the parent company and consolidated financial statements at March 31, 2021 All amounts in thousands, except as otherwise stated

---

#### 18.4 Credit quality of financial assets

##### (a) Trade accounts receivable

The Company's clients do not have risk ratings assigned by credit rating agencies. For this reason, the Company developed its own credit rating system for all accounts receivable from clients in Brazil and abroad.

At March 31, 2021 and December 31, 2020, considering the stages 1, 2 and 3 of expected credit losses, the percentage of trade accounts receivable by risk ratings was as follows:

		(%)	
		Mar/2021	Dec/2020
1	Minimal Risk	68.82	67.52
2	Low Risk	19.74	20.08
3	Medium Risk	9.42	10.43
4	High Risk	1.42	1.10
5	Very High Risk	(i) 0.60	0.86

(i) Most clients in this group are inactive and the respective accounts are in the process of collection actions in the courts. Clients in this group that are still active buy from Braskem and pay in advance.

Default indicators:

	Last 12 months	
	Domestic market	Export market
March 31, 2021	0.02%	0.10%
December 31, 2020	0.05%	0.14%
March 31, 2020	0.07%	0.13%

This calculation considers the accounts receivable figure overdue more than 30 days, divided by consolidated gross revenue in the last 12 months.

For the export market, around 80% of the portfolio has guarantees, consisting primarily of credit insurance. For the domestic market, around 27% of the portfolio has guarantees, mainly surety from the partners of counterparties, complemented by credit insurance.

## Braskem S.A.

### Management notes to the parent company and consolidated financial statements at March 31, 2021 All amounts in thousands, except as otherwise stated

#### (b) Other financial assets

In order to determine the credit ratings of counterparties of financial assets classified under cash and cash equivalents, and financial investments, the Company uses the risk rating of agencies Standard & Poor's, Moody's and Fitch Ratings, within the limits established in its financial policy approved by the Board of Directors.

	<u>Mar/2021</u>	<u>Dec/2020</u>
<b>Financial assets with risk assessment</b>		
AAA	12,973,411	13,639,273
AA+	416,101	412,612
AA	824,864	735,755
AA-	206,083	199,405

	<u>16,343,987</u>	<u>17,451,081</u>
<b>Financial assets without risk assessment</b>		
Other financial assets with no risk assessment	(i) <u>43,214</u>	<u>54,562</u>
	43,214	54,562
<b>Total</b>	<u><u>16,387,201</u></u>	<u><u>17,505,643</u></u>

(i) Investments approved by the Management of the Company, in accordance with the financial policy.

#### 18.5 Sensitivity analysis

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

##### (a) Selection of risks

On March 31, 2021, the main risks that can affect the value of Company's financial instruments are:

- U.S. dollar/Brazilian Real exchange rate;
- Mexican peso/Brazilian Real exchange rate;
- Libor floating interest rate;
- IPCA inflation rate;
- Selic interest rate; and
- CDI interest rate.

For the purposes of the risk sensitivity analysis, the Company presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

## **Braskem S.A.**

### **Management notes to the parent company and consolidated financial statements at March 31, 2021** All amounts in thousands, except as otherwise stated

---

#### **(b) Value at risk**

The value at risk of the derivatives held by the Company which is defined as the impact on the mark-to-market adjustment that could result in one month as from March 31, 2021, with a probability of 5%, and under normal market conditions, was estimated by the Company at US\$52,685 for put options and call options (Note 18.2.1 (a.i)), US\$2.444 for the swap of Libor related to Braskem Idesa project (Note 18.2.1 (a.iii)) and US\$18.835 for Dollar swap (Note 18.2.1(a.ii)).

#### **(c) Selection of scenarios**

The Focus Market Readout published by the Central Bank of Brazil (BACEN) was used to create the probable scenario for the U.S. dollar/Brazilian Real exchange rate, the Selic interest rate and the CDI interest rate as at March 31, 2021. The Selic rate is used as benchmark for sensitivity analysis of the CDI rate.

According to the Market Readout, at the end of 2021, the U.S. dollar will remain at approximately R\$5.33, while the Selic rate should remain at 5.00% p.a. The Selic rate is used as benchmark for sensitivity analysis of the CDI rate.

Since the Market Readout survey does not include consensus forecasts for the Libor rate, the average projection of the U.S. Federal Reserve for the Federal Funds rate at the end of the year was used, published in March 2021, in comparison with the Treasury Rate curve on March 31, 2021.

For each variable analyzed in the sensitivity analysis, the Company estimated annualized variations corresponding to 1 to 3 standard deviations of the monthly averages of the last five years, which are equivalent to approximately 15.866% and 0.135% of probability of occurrence for the reasonably possible and possible scenarios, respectively. Then, these changes are then applied to the current market levels of each variable.

#### **Effects of COVID-19**

The assumptions of the future value adopted in the construction of the probable scenario and the current value of each variable in this analysis are referenced to the reporting date March 31, 2021. Given the instability in the current economic scenario caused by the COVID-19 pandemic, interest rates and foreign exchange rates are affected daily. Therefore, during the period for reporting this quarterly information the current value and the probable scenario of these parameters may have changed. However, Braskem's gains and losses in these probable stress scenarios are analyzed by increasing each variable according to the aforementioned.

**Braskem S.A.**

**Management notes to the parent company and consolidated financial statements at March 31, 2021**  
**All amounts in thousands, except as otherwise stated**

The sensitivity values in the table below are the changes in the value of the financial instruments in each scenario.

Instrument / Sensitivity	Gain (losses)

<b>Total</b>		<b>829,554</b>	<b>874,208</b>	<b>733,508</b>	<b>756,018</b>

### (a) Provision for recovery of environmental damages

Braskem operates in several countries and is subject to different environmental laws and regulations inherent to the operations and activities areas. Remediation expenses are incurred during several years due to their complexity and extension. New information on websites, new technologies or future developments, such as involvement in investigations by regulatory agencies, may require that we reevaluate our potential exposure related to environmental matters. The Company has identified areas where remediation actions will be necessary. Due to the high complexity in identifying potential environmental impacts, alternative solutions and recovery costs estimations, these estimates can only be made with reasonable assurance after the completion of all phases of the process to identify and investigate environmental liabilities, which are in accordance with the phases and protocols established by environmental agencies. The Company monitors the areas under study to capture any new facts and changes in circumstances that change the prognosis of actions to be adopted and consequently affect the estimation of provision for environmental remediations.

### (b) Rebates

Some sales agreements of Braskem provide for a rebate, in products, should certain sales volumes be achieved within the year, six-month period or three-month period, depending on the agreement. The bonus is recognized monthly in a provision, assuming that the minimum contractual amount will be achieved. As it is recognized based on contracts, the provision is not subject to significant uncertainties with respect to their amount or settlement.

### 22.3 Class action

On August 25, 2020, an action was filed against Braskem and some of its current and former executives in the US District Court for the District of New Jersey, in the United States, on behalf of an alleged class of investors who acquired Braskem's shares between May 6, 2016 and July 8, 2020. The action is grounded in the U.S. Securities

## **Braskem S.A.**

### **Management notes to the parent company and consolidated financial statements at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

Exchange Act of 1934 and its rules, based on allegations that the defendants made false statements or omissions related to the geological event in Alagoas. On January 15, 2021, the Court named two plaintiffs to act as leading plaintiffs in the action. On April 28, 2021, the lead plaintiffs of the action filed a consolidated complaint with its initial arguments. The Company engaged a specialized US-based law office to represent it in the class action.

Braskem's Management, based on its assessment and that of its external legal advisors, and given the initial phase of the aforementioned class action, considers that it is not possible at the moment to reliably estimate the potential amount involved.

Braskem cannot reliably predict the future developments of this matter or the expenses arising from it, including rates and costs in solving the dispute. The Company may be named as a defendant in other legal actions.

#### **22.4 Contingent assets**

Contingent assets are possible assets whose existence will be confirmed by the occurrence or non-occurrence of uncertain future events that are not wholly within the Company's control. Contingent assets are not recognised, but they are disclosed when it is more likely than not that an inflow of benefits will occur. However, when the inflow of benefits is virtually certain, an asset is recognised in the financial position statement because that asset is no longer considered contingent.

#### **Exclusion of ICMS from PIS and COFINS calculation base**

The main federal tax credits refer to the exclusion of ICMS from the PIS/COFINS calculation basis. The Company and its merged companies filed various lawsuits claiming recognition of the right to exclude ICMS from the calculation basis for PIS and COFINS and the consequent repetition of undue payment. The oldest period of the lawsuit dates back to 1991.

In 2021, the final and unappealable decisions of the lawsuit filed originally by merged companies were certified. As a result of these decisions, during the first quarter of 2021, the amount of R\$1,231,549 (R\$438,044 in 2020) related to surpluses of PIS and COFINS taxes was recognized, of which R\$557,897 was recorded under "Other operating income (expenses)" (R\$310,557 in 2020) and R\$673,652 under "Financial income" (R\$127,488 in 2020).

Of the total tax credit recorded by the Company related to this topic, since 2019, R\$2,828,150 already has been offset. On March 31, 2021, the balance was R\$1,473,221, recorded under current assets. The balance on December 31, 2020 was R\$1,002,605, registered under current.

With regard to the lawsuits with final and unappealable decisions, certain decisions involve expressly the credit calculation criteria, while others were more generic, only determining the exclusion of this tax. The Company, assisted by specialized third-party consulting firm, proceeded with the measurement of these tax credits, basically considering the amount of ICMS stipulated on the sales invoices and other tax information on the ancillary obligations to ensure the consistency of the calculations, grounded in the legal opinion.

The Company has other lawsuits about the same topic that are still pending a final and unappealable decision. The oldest period of these lawsuits pending decisions dates back to August 2001. At March 31, 2021, for which the Company estimates future recognition of R\$782,365.

## **23 Leniency agreement**

### **Global Settlement with authorities**

In the context of allegations of undue payments in connection with Operation Car Wash in Brazil, the Company hired external experts in investigation to conduct an independent investigation into such allegations (“Investigation”) and to report their findings. The Company cooperated and continues to cooperate with government authorities from various jurisdictions, including the Department of Justice of the United States (DoJ), the Securities and Exchange Commission of the United States (SEC), the Federal Prosecution Office (MPF) and the Swiss Office of the Attorney General (OAG).

In December 2016, the Company entered into Leniency Agreements with the Federal Prosecution Office (“MPF Agreement”) and with U.S. and Swiss authorities (“Global Settlement”), in the approximate amount of US\$957 million (approximately R\$3.1 billion, at the time), which were officially ratified as follows:

1. In Brazil, the MPF Agreement was ratified by the 5<sup>th</sup> Coordination and Review Chamber of the MPF on December 15, 2016, with ratification by the 13<sup>th</sup> Federal Court of Curitiba on June 6, 2017.
2. The agreement with the U.S. Department of Justice (“DoJ”) was confirmed by a U.S. court ruling on January 26, 2017 (“Plea Agreement”).
3. The agreement with the Securities and Exchange Commission (“SEC”) was confirmed on February 28, 2017.
4. The agreement with the Swiss authorities did not require ratification to produce effects; on December 21, 2016, the OAG concluded its investigations and issued an order to conclude the case based on the Company’s collaboration.

As disclosed to the market on July 10, 2018 and as per the material fact notice on May 27, 2019, the Company engaged in a process of cooperation and negotiation with the Ministry of Transparency and the Office of The Federal Controller General (“CGU”) and the Office of the Attorney General (“AGU”), which culminated in the execution of the leniency agreement with such authorities on May 31, 2019 (“CGU/AGU Agreement” and, jointly with the Global Settlement, “Agreements”).

The CGU/AGU Agreement addresses the same facts that are the subject of the Global Settlement entered into in December 2016 and provides for an additional disbursement of R\$409,877 million due to the calculations and parameters adopted by CGU/AGU. As ratified by the Federal, funds under the MPF Agreement were allocated to the payment of the CGU/AGU Agreement (the outstanding installments of the MPF Agreement will benefit from CGU/AGU Agreement and will be updated by the variation in the SELIC basic interest rate as of the execution of the CGU/AGU Agreement).

The AGU, CGU and MPF agreed to allocate most of the amounts received under the Agreements to the reparation of victims of the wrongdoings, including other public authorities and agencies, and to adopt monitoring measures of such third parties with which Braskem comes to start negotiations in connection with the matters under the Agreements, seeking to avoid the duplication of compensation.

Of the aggregate amount of the Agreements, the Company has already paid approximately R\$2.7 billion, as follows:

1. US\$94,894 (R\$296,591) to the DoJ, paid on February 8, 2017;
2. US\$65,000 (R\$206,460) to the SEC, paid on April 27, 2017;
3. CHF30,240 (R\$104,307) to the Swiss Office of the Attorney General, paid on June 27, 2017;
4. R\$736,445 to the MPF, paid on July 6, 2017;
5. R\$267,985 to the MPF, related to the first of six annual installments due by 2023, paid on January 30, 2018;

6. CHF16,065 (R\$62,021) to the Swiss Office of the Attorney General, related to the first of four annual installments due by 2021, paid on June 28, 2018;
7. R\$278,034 to the MPF, related to the second of six annual installments payable until 2023, paid on January 30, 2019;
8. CHF16,065 (R\$58,034) to the Swiss Office of the Attorney General, related to the second of four annual installments payable until 2021, paid on June 27, 2019;
9. R\$257,256 paid on January 30, 2020 to the Federal Government corresponding to the annual installment of the leniency agreements entered into with the MPF and with the CGU and AGU, as described above; and
10. CHF16,065 (R\$92,586) to the Swiss Office of the Attorney General, related to the third of four annual installments payable until 2021, paid on June 30, 2020.
11. R\$302,640 paid on February 1, 2021 to the Federal Government corresponding to the annual installment of the leniency agreements entered into with the MPF and with the CGU and AGU.

The amount of outstanding installments is approximately R\$1.1 billion and will be paid as follows:

1. CHF16,065 to the Swiss Office of the Attorney General, corresponding to last outstanding annual installments, due on June 30, 2021;
2. Approximately R\$1 billion under the MPF Agreement and CGU/AGU Agreement, in four annual installments adjusted by the variation in the SELIC rate and payable until January 30 of 2025. To guarantee payment of the installments of these installments coming due, Braskem gave as collateral assets from its property, plant and equipment corresponding to one annual installment;

In 2019, the Company also began negotiations with the Bahia State and Rio Grande do Sul State Prosecution Offices. Both adhered to the MPF Agreement. No additional payments are expected to be made by the Company.

The Agreements do not exempt the Company from other third parties, with legitimate interest, seeking indemnity for damages caused by the facts covered by the Agreements, including other authorities that seek to impose new pecuniary sanctions or fines or initiate new investigations into the Company. Therefore, even if the Company does not anticipate the need for any additional payment, it cannot guarantee that the total amount agreed will be sufficient for full reparation of all any injured parties.

The Company will continue to cooperate with the competent public authorities, while improving its compliance and anti-corruption practices. For the last three years, the Company was subject to external independent monitoring as a result of the Agreements. The monitors were responsible for verifying compliance with the Global Settlement, as well as the efficacy of internal controls, policies and procedures of the Company in reducing the risk of noncompliance with anti-corruption laws.

In March 2020, based on the certification report issued by the independent monitors, the MPF confirmed the end of the monitorship, the effectiveness of the Company's compliance program and the fulfillment of the obligations under the MPF Agreement. Subsequently, on May 13, 2020, the DoJ and the SEC confirmed the conclusion of the monitorship established under the agreements signed on December 21, 2016 ("Agreements") with said authorities. As per the Material Fact notice disclosed by the Company at the time, "the decision of the DoJ and SEC was based on a final report by the independent monitors that attested to the implementation, by the Company, of all the recommendations for structuring and executing its compliance program and that found said program in compliance with the standards established in the Agreements."

The Company is in compliance with all of its obligations under the Agreements.

## **24 Geological event - Alagoas**

The Company operated, until May 2019, salt mining wells located in the city of Maceió, state of Alagoas, with the purpose of supplying raw material to its chlor-alkali and dichloroethane plant. The operations were interrupted by the Company in May 2019, due to the release of a report by the Geological Survey of Brazil (CPRM), indicating that the geological phenomenon observed in the region, would be related to the rock salt exploration activities developed by Braskem. In view of these events, on May 9, 2019, Braskem decided to suspend its salt mining activities and the operation of its chlor-alkali and dichloroethane plant.

With the support of independent institutions and nationally and internationally renowned specialists, the Company conducted and has been conducting a series of studies focusing on: (i) understanding the geological phenomenon and possible surface effects; and (ii) analyzing the stabilization of the wells. The studies have been shared with the National Mining Agency (ANM) and other pertinent authorities, with which the Company has been maintaining constant dialogue.

On November 14, 2019, Braskem presented to the ANM measures for shutting down its salt mining fronts in Maceió, with measures for the closure of its wells, and proposed the creation of a protective area surrounding certain wells as a precautionary measure to ensure public safety. These measures are based on a study conducted by the Institute of Geomechanics of Leipzig (IFG), in Germany, an international reference in the geomechanical analysis of areas of salt extraction by dissolution, and are being adopted in coordination with the Brazilian Civil Defense and other authorities.

On January 3, 2020, the 3<sup>rd</sup> Federal Court of Alagoas ratified the Agreement to Support the Relocation of People in Risk Areas (“Agreement”), entered into by Braskem and the State Prosecution Office (“MPE”), the State Public Defender’s Office (“DPE”), the Federal Prosecution Office (“MPF”) and the Federal Public Defender’s Office (“DPU”, and in conjunction with the MPE, DPE and MPF, the “Authorities”). The Agreement establishes cooperative actions for relocating residents from risk areas and guaranteeing their safety, which provides support, under the Financial Compensation and Support for Relocation Program (“PCF”) implemented by Braskem to the population in specified risk areas.

In June 2020, the Company received from the Authorities an official letter informing it of the updating of the Map of Sectors of Damages and Priority Action Lines by the Civil Defense of Maceió (“Civil Defense Map”), which expanded the area to be relocated. On July 15, 2020, the Company and the Authorities signed the First Amendment to the Agreement to incorporate this expansion into the PCF.

In September 2020, specialized and independent technical studies commissioned by the Company and carried out by internationally recognized entities (“Studies”) were concluded. The Studies presented the potential impacts from the geological event on the surface of the region, bringing an analysis of scenarios in the short and long run, which include areas identified by the Civil Defense Map of June 2020. The Studies were submitted to the competent Authorities for definition of possible actions to be taken under mutual agreement. Given the update of the Civil Defense Map, in September 2020, the Company and the Authorities agreed to include additional properties in the PCF, with the execution of the Instrument of Resolutions in October 2020.

In parallel, as previously disclosed, the Company has been negotiating with the competent authorities the Public-Interest Civil Action for Socio-environmental Reparation proposed by the MPF, related to the geological event in Alagoas.

On December 30, 2020, the Company and the Authorities executed:

## Braskem S.A.

### Management notes to the parent company and consolidated financial statements at March 31, 2021

All amounts in thousands, except as otherwise stated

(i) the Second Amendment to the Agreement dated January 3, 2020 (“Agreement for Compensation of Residents”) through which the parties agreed to include in the PCF the relocation of additional properties defined by the Map of Sectors of the Civil Defense, which was updated in December 2020 to consider, among other information, the areas with future surface impacts, including in the long term, according to the Studies and comprising the area affected and with potential to be affected by the geological event according to these documents; and

(ii) the “Agreement to Dismiss the Public-Interest Civil Action on Socio-Environmental Reparation” and the “Agreement to define the measures to be adopted regarding the preliminary injunctions of the Public-Interest Civil Action on Socio-Environmental Reparation” with the MPF and MPE, the latter as intervening-consenting party (jointly referred to as "Agreement for Socio-Environmental Reparation"), both detailed in Note 26.1 (ii). Moreover, the Agreement for Socio-Environmental Reparation envisages the inclusion of other parties, and should be negotiated in the coming months.

As assessed by the Company and its external advisors, considering the short- and long-term effects of technical studies and the existing information and better estimates of expenses for implementing several measures connected with the geological event in Alagoas, the provision recorded on March 31, 2021 was R\$8,453,797, with R\$4,228,652 under current liabilities and R\$4,225,145 under non-current liabilities. On December 31, 2020, the provision was R\$9,175,777, with R\$4,349,931 under current liabilities and R\$4,825,846 under non-current liabilities.

The following table shows the changes in the provision in the period:

	<b>Consolidated</b>
<b>Balance at December 31, 2020</b>	<b>9,175,777</b>
Provisions reversal	(112,143)
Constitution of present value adjustment	(27,011)
	<b>(139,154)</b>
Write-offs (*)	(597,240)
Realization of present value adjustment	14,414
<b>Balance at March 31, 2021</b>	<b>8,453,797</b>
Current liability	4,228,652
Non-current liability	4,225,145
<b>Total</b>	<b>8,453,797</b>

(\*) Of this amount, R\$538.416 refers to payments made and R\$58.824 was reclassified to the suppliers.

The amounts included in the provision may be divided among the following action fronts:

- a. Support for relocating and compensating the residents and owners of the properties located in the risk protection and monitoring areas, including properties that require special measures for their relocation, such as hospitals, schools and public equipment.

For this action front, a provision was accrued in the amount of R\$4,820,396 (R\$4,790,543 net of adjustment to present value), which comprises expenses related to the relocation actions, such as relocation allowance, rent

## Braskem S.A.

### Management notes to the parent company and consolidated financial statements at March 31, 2021 All amounts in thousands, except as otherwise stated

---

allowance, household goods transportation and the negotiation of individual agreements for compensation the residents and third parties affected.

- b. Actions for closing and monitoring the salt wells. Based on the findings of sonar and technical studies, Braskem has defined stabilization and monitoring actions for all 35 existing salt mining wells. For four of them, the recommendation is to be filled with solid material, a process that should take three years. For the other 31 wells, the recommended actions are: conventional closure using the buffering technique, which consists of pressuring the cavity, a method adopted worldwide for cavities post-operation; confirmation of natural filling status; and, for certain wells, monitoring using sonar. The monitoring system implemented by Braskem provides for actions to be developed during and after the closure of wells, which basically are as follows: (i) monitoring using sonar or through pressure and temperature measurement in salt cavities; (ii) subsidence monitoring system; (iii) monitoring of vibrations using seismographs and microseismographs; and (iv) monitoring by tiltmeter and e inclinometer.

The actions conducted by the Company are based on technical studies by contracted experts, with the recommendations presented to the competent authorities. The Company is implementing the actions approved by ANM.

The plans to close wells have a certain level of uncertainty, given that they may be updated until the cavities reach stabilization. Continuous monitoring is essential for confirming the results of the current recommendations. In addition, the conclusion of the studies to confirm the natural filling of certain cavities and the assessment of the future behavior of cavities to be monitored using sonar could indicate the need for certain additional measures to stabilize them.

The total provision for implementing the measures defined for the 35 wells is R\$1,468,747 (R\$1,450,776 net of adjustment to present value). The amount was calculated based on existing techniques and solutions planned for the current conditions of the wells, including expenses with technical studies and their monitoring. The amount provisions could be changed in the future, in accordance with the results of the monitoring of the wells, the progress of implementing the plans to close wells, the monitoring of the ongoing measures and other possible natural alterations.

The definition of the necessary measures for the recovery of areas potentially impacted by the geological phenomena depends on a more concrete diagnosis of the situation of the area and further discussion between the Company and the competent authorities (including the ANM).

- c. Social and urban actions, in accordance with the Agreement for Socio-environmental Reparation signed on December 30, 2020, allocating R\$1,580,000 for the adoption of actions and measures in vacated areas, urban mobility and social compensation actions, with R\$300 million going to indemnification for social damages and collective pain and suffering and possible contingencies related to the actions in the vacated areas and urban mobility actions. At March 31, 2021, the provision amounted to R\$1,550,000 (R\$1,457,289 net of adjustment to present value).
- d. Additional measures, for which the provision amounts to R\$768,757 (R\$755,190 net of adjustment to present value), for expenses with: (i) actions related to the Technical Cooperation Agreements entered into with the Civil Defense; (ii) the hiring of external advisors to support the execution of the relocation actions and compensation of the families; (iii) infrastructure to provide services to residents (Residents Center); (iv) expenses with managing the event in Alagoas related to communication, compliance, legal services, etc.; and (v) other matters classified as a present obligation for the Company, even if not yet formalized.

## **Braskem S.A.**

### **Management notes to the parent company and consolidated financial statements at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

The Company's provisions are based on current estimates and assumptions and may be updated in the future due to new facts and circumstances, including timing changes, extension and way of execution; effectiveness of action plans; and the conclusion of current and future studies that indicate recommendations of experts, and other new developments on the topic.

Braskem continues to face and could still face various lawsuits filed by individuals or legal entities not included in the PCF or that disagree with the individual proposal of the agreement, as well as potential claims by public utility concessionaires.

The measures related to the plans for the closure of mining fronts are subject to the analysis and approval of ANM, the monitoring of results of the measures un implementation, as well as the changes related to the dynamic nature of geological events.

The actions to repair, mitigate or offset potential environmental impacts and damages, as provided for in the Socio-environmental Reparation Agreement, to be financed by Braskem, will be defined after the conclusion of the Environmental Diagnosis, to be conducted by a specialized and independent company. At this time, it is impossible to predict the outcome of these Environmental Diagnosis studies or their potential implications for additional disbursements to the costs already provisioned for by the Company. Furthermore, the Socio-Environmental Reparation Agreement envisages the potential adherence by other parties, including the Municipality of Maceió, which will be negotiated over the coming months. To date, the Company is unable to predict the results of any discussions or any of their associated costs.

Therefore, the Company cannot eliminate the possibility of future developments related to the topic or related expenses, and the costs to be incurred by Braskem may differ from its estimates.

The Company is negotiating with its insurers the coverage of its insurance policies. The payment of compensation will depend on technical assessment of the insurance coverage under these policies, taking into consideration the complexity of the subject. For this reason, no payment of compensation was recognized in the quarterly information of the Company.

#### **24.1 Lawsuits pending**

In the context of this event, the following lawsuits were filed against the Company:

**(i) Public-Interest Civil Action (ACP) filed by the Alagoas State Prosecution Office (MPE) and the Alagoas State Public Defender's Office – Reparation for Residents**

Public-Interest Civil Action for Socio-environmental Reparation claiming the payment of indemnification for damages caused to the buildings and the residents of areas affected in the Pinheiros district and surrounding areas (currently includes the Mutange, Bebedouro and Bom Parto districts), in the total minimum amount of R\$6.7 billion, with initial request for provisional measure to freeze the Company's financial and other assets in the same amount. Successive orders to freeze funds resulted in the court blocking of R\$3.7 billion in assets, with the issue by the Company of a performance bond in the total amount of R\$6.4 billion. Once the case reached the Federal Courts, the Federal Prosecution Office started to participate in the action.

The first agreement under the Public-Interest Civil Action for Socio-environmental Reparation was approved on January 3, 2020. The Agreement to Support the Relocation of People in Risk Areas ("Agreement"), entered into by Braskem and the State Prosecution Office ("MPE"), the State Public Defender's Office ("DPE"), the Federal Prosecution Office ("MPF") and the Federal Public Defender's Office ("DPU", and jointly with the MPE, DPE and MPF, the "Authorities"), establishes cooperative actions for relocating people in risk areas and guaranteeing

## **Braskem S.A.**

### **Management notes to the parent company and consolidated financial statements at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

their safety, which provides support under the Financial Compensation and Support for Relocation Program (“PCF”) implemented by Braskem, for the population in specified risk areas. The Agreement enabled the unfreezing of the Company’s assets, the replacement of the former performance bond policies for two new policies in the aggregate amount of R\$3 billion (with R\$2 billion as guarantee of this Public-Interest Civil Action and R\$1 billion for guaranteeing the Public-Interest Civil Action described in item (ii) below) and the cessation of new asset freezing orders.

In July 2020, the first Amendment to the Agreement was executed to include properties in the relocation area and support under the PCF, based on the update of the Map of Sectors of Damages and Priority Action Lines by the Civil Defense of Maceió (“Civil Defense Map”). The Company and the Authorities agreed to include properties in the service area in October, as a result of a new update of the Civil Defense Map after the conclusion of the independent technical and specialized studies engaged by the Company, which indicated potential impacts from the geological event on the region’s surface (“Studies”).

On December 30, 2020, the Company and the Authorities executed a second amendment to the Agreement (“Agreement for Compensation of Residents”) to dismiss the Public-Interest Civil Action, through which the parties agreed to include in PCF the relocation of additional properties defined in the most recent version of the Civil Defense Map and in the Studies. The Agreement for Compensation of Residents includes the area currently affected by the geological event, according to the Civil Defense, and the areas with potential future impacts indicated in the Studies. The Company estimates that the total number of properties covered by PCF after the execution of the Second Amendment is around 15,000 properties.

Moreover, the Company and the Authorities agreed to: (i) created a technical group to monitor the geological event and study the areas adjacent to the Civil Defense Map for a period of five years; (ii) transfer R\$1 billion to Braskem’s bank account specifically to cover the costs of the PCF, in ten monthly installments of R\$100 million each, starting in January 2021; and (iii) reduce the performance bond in force, from R\$2 billion to R\$1.8 billion.

With the approval by the courts of the Agreement for Compensation of Residents on January 6, 2021, this Public-Interest Civil Action was dismissed.

To implement the actions envisaged in the Public-Interest Civil Act, the Company undertook to maintain R\$2.7 billion in a checking account (R\$1.7 billion under the Agreement and an additional R\$1 billion under the Second Amendment), with minimum working capital of R\$100 million, whose transactions will be verified by an external audit company.

On March 31, 2021, arising from the costs incurred during the quarter related to the PCF, the balance of this checking account corresponded to R\$1,327,431 under current assets (R\$1,322,725 on December 31, 2020). Over 2021, the Company entered into a commitment to allocate R\$1 billion to this checking account, in ten monthly installments of R\$100 million starting January 2021, as provided for in the Agreement for Compensation of Residents.

#### **(ii) Public-Interest Civil Action filed by the Alagoas State Federal Prosecution Office (MPF-AL) – Social-environmental reparation**

Public-Interest Civil Action claiming the payment by the Company of indemnification for socio-environmental damages and other collective damages, as well as the adoption of corrective and environmental compliance measures, with preliminary injunction requiring the freezing of assets, suspension of borrowings with the BNDES, formation of an own private fund in the initial amount of R\$3.1 billion and the pledging of guarantees in the amount of R\$20.5 billion. The original amount of the action, initially at R\$28.3 billion, was adjusted by a court decision to R\$27.6 billion.

## **Braskem S.A.**

### **Management notes to the parent company and consolidated financial statements at March 31, 2021**

All amounts in thousands, except as otherwise stated

---

In January 2020, the judge of the 3<sup>rd</sup> Federal Court of Alagoas denied the preliminary requests of the MPF, which filed appealed the decision. To avoid the risk of any new freezing of funds arising from this action, the Company presented a performance bond in the amount of R\$1 billion in the process, as defined in the Agreement described in item (i) above.

On December 30, 2020, the Agreement for Socio-environmental Reparation was executed, with the Company mainly undertaking to: (i) adopt the necessary measures to stabilize the cavities and monitor the soil; (ii) repair, mitigate or compensate potential impacts and environmental damages arising from salt mining in the Municipality of Maceió; and (iii) repair, mitigate or compensate potential impacts and social and urban damages arising from salt mining in the Municipality of Maceió, as detailed below:

(i) To stabilize the cavities and monitor the soil, the Company will continue to implement the action plans involving the closure of mining fronts prepared by Braskem and pending approval by the ANM, whose measures can be adjusted until the stability of cavities is verified.

(ii) Regarding the potential environmental impacts and damages resulting from salt mining in the Municipality of Maceió: as agreed with the MPF, the Company hired a specialized independent company to identify and recommend measures for recovering, mitigating or compensating any environmental impacts identified as the result of salt mining activities in Maceió. After the study is concluded, the Company will implement and pay for any measures recommended by the study and agreed upon between the Company and the MPF. Since the study is in progress, we cannot anticipate its outcome or if it will entail additional provisions.

(iii) Regarding potential impacts and social and urban damages arising from salt mining in the city of Maceió: to allocate the total amount of R\$1,280 million to adopt actions and measures in vacated areas, urban mobility actions and social compensation actions.

Moreover, the Company and the MPF agreed to: (i) allocate the additional amount of R\$300 million for indemnification for social and collective pain and suffering and possible contingencies related to actions in vacated areas and in urban mobility actions; (ii) constitute a security interest on certain assets of the Company in the amount of R\$2.8 billion to replace the performance bond of R\$ 1 billion; and (iii) engage specialized consulting firms to support the definition of actions established in the Agreement for Socio-environmental Reparation and the update of the Company's socio-environmental compliance program.

With court approval of the Agreement for Socio-environmental Reparation on January 6, 2021, the Public-Interest Civil Action for Socio-environmental Reparation was dismissed with regard to Braskem. Moreover, this agreement provides for the possibility of including other parties, at the discretion of the main parties.

### **(iii) Action for Damages – Pinheiro District Property**

Action for Damages filed by Construtora H. Lobo (under court-supervised reorganization), a Contractor that claimed it suffered damages and loss of profits due to an agreement to purchase from Braskem a property in the District of Pinheiro. Said agreement was terminated by Braskem due to lack of payment by the Contractor. Nevertheless, the Contractor claims that Braskem omitted information on the existence of structural problems in the deactivated salt mining wells located on said property. As of March 31, 2021, the amount of this action is R\$191 million (R\$181 million at December 31, 2020).

The Management, supported by the opinion of the external legal advisors, classifies the probability of loss in this case as possible.

**(iv) Civil Investigation – Urban Damages**

On June 19, 2020, the Company took cognizance of the Civil Investigation launched by the Alagoas State Prosecution Office (MPE) to: (i) calculate the extent of the urban damages caused by the geological event that occurred in Maceió; (ii) seek, jointly with those entitled, necessary and adequate architectural solutions for the destination, restoration and or use of the cited empty spaces left in the districts impacted; (iii) calculate, if applicable, potential compensatory liabilities for the damages caused to the urban order.

On July 13, 2020, the Company was requested to provide preliminary information on the planned use of the region. The object of this Investigation is similar to that of the Public-Interest Civil Action filed by the Federal Prosecution Office in Alagoas related to socio-environmental damages referred to in item (ii) above. In the Socio-environmental Reparation Agreement, executed on December 30, 2020 with the intervenience of the MPE, the extinction of the investigation was agreed. On January 21, 2021, the dismissal and the establishment of an administrative procedure was determined, with a view to monitoring and inspecting compliance with the Socio-environmental Reparations Agreement.

**(v) Individual actions – Indemnifications related to the impacts of subsidence and relocation of areas affected**

On March 31, 2021, Braskem was defendant in several actions, that, in aggregate, involve the amount of approximately R\$577 million (R\$573 million on December 31, 2020), filed by individuals in Brazil and abroad, seeking the payment of indemnifications related to the geological event in Maceió.

**(vi) Indemnifying actions – Companhia Brasileira de Trens Urbanos (“CBTU”)**

On February 2, 2021, the Company was notified of the filing of an action by Companhia Brasileira de Trens Urbanos (“CBTU”), formulating initially only a preliminary injunction for maintaining the terms of the cooperation agreement signed previously by the parties. The request was denied in lower and appellate courts, given the fulfillment of the obligations undertaken by Braskem. On February 24, CBTU filed an amendment to the initial request claiming the payment of compensation for losses and damages in the amount of R\$221,600 and for pain and suffering in the amount of R\$500, as well as the imposition of the obligations, including the construction of a new rail line to substitute the stretch that passed through the area. CBTU attributes to the claim the approximate amount of R\$1.3 billion.

Based on the opinion of external legal counsel, the Management believes that the request has a possible risk of ruling for sufficiency of the claim. No judicial deposit or any other type of guarantee has been made.
