

Valuation Report
Braskem S.A. and Quattor Participações S.A.
March 25th, 2010

Banco Bradesco BBI S.A. (“Bradesco BBI”) was engaged by Braskem S.A. (“Braskem”) in order to prepare an independent valuation report (“Valuation Report”) of the following assets: Braskem and Quattor Participações S.A. (“Quattor”, and together with Braskem hereinafter referred to as “Companies”) related to a possible incorporation of Quattor by Braskem (“Transaction”), under the terms of article 227 of Law nº 6404 of December 15th, 1976, as amended (“Brazilian Corporation Law”) and other laws and applicable rules. The information below is relevant and should be carefully and fully observed:

- ▶ This Valuation Report can only be used under the terms of the Brazilian Corporation Law, of the Brazilian Securities Exchange Commission (“Comissão de Valores Mobiliários” or “CVM”) instructions and of other applicable rules in order to provide subsidies to be used in the Transaction and must only be used by Braskem’s management, its Board of Directors and General Meeting of Shareholders under the scope of the Transaction, and shall not be used or used as reference by any person to whom this Valuation Report was not directly destined, as referred above, or for any purpose other than those described herein
- ▶ The base date of the financial information reports used on the valuation included in this Valuation Report is September 30th, 2009; this Valuation Report was based, primarily, on the following information (collectively denominated “Information”):
 - (i) Operating projections of the Companies provided by Braskem’s management
 - (ii) Analysis of relevant public information, including sector reports, surveys, financial, economic and market analysis and criteria
 - (ii) analysis of the consolidated financial reports: (a) of Braskem, which also include iQ Soluções & Química S.A. (“quantiQ”), previously denominated Ipiranga Química S.A., audited by KPMG Auditores Independentes (“KPMG”) for the years ended on December 31st, 2006, 2007 and 2008 and on September 30th, 2009; (b) of quantiQ, audited by PricewaterhouseCoopers Auditores Independentes for the years ended on December 31st, 2006, 2007 and 2008 and unaudited for the year ended on September 30th, 2009; (c) of Quattor Química S.A. (“Quattor Química”), Rio Polímeros S.A. (“RioPol”) and Polibutenos S.A. Indústrias Química (“PIB”), unaudited for the year ended September 30th 2009 and (d) of Quattor Petroquímica S.A. (“Quattor Petroquímica”, and together with Quattor Química and RioPol hereinafter referred to as “Quattor’s Subsidiaries”) audited by PricewaterhouseCoopers Auditores Independentes for the years ended on December 31st, 2006, 2007 and 2008 and on September 30th, 2009
 - (iii) analysis of other information provided by Braskem, including the report prepared by Chemical Market Associates, Inc. (“CMAI”) with price projections for the main products and raw materials commercialized by the Companies
 - (iv) verification of the Information’s consistency and discussions with Braskem’s management about the business outlooks for the Companies
- ▶ The Valuation Report did not include an independent verification of the data and the Information and we have assumed that all Information used in this Valuation Report is true, precise and complete in all the relevant matters, so this Valuation Report must not be considered as an auditing according to the generally accepted accounting principles. No relevant information related to our scope of work was kept undisclosed to us. As for the portion of Information that embodies projections or estimates of future events, we have assumed that such Information reflects the best estimates currently available about the Companies’ future performance. Also, regarding our review of the Information, we have analyzed its consistency, but have not independently checked any part of the Information, or conducted any investigation or evaluation of any of the Companies’ assets or liabilities (contingent or not), and we have not received any report on the subject. Although the analyses and results presented herein are based in future projections, this Valuation Report is not indicative, in any level or form, of any real future results that can be higher or lower from those presented herein. We were also not asked to conduct (and we did not conduct) any physical inspections of the Companies’ properties or facilities. Finally, we have not evaluated the Companies’ solvency or fair value considering the laws regarding bankruptcy, insolvency or of similar effect.

- ▶ As a result of the limitations mentioned above, Bradesco BBI does not and will not make any expressed or implicit representation or declaration in relation with the truthfulness or integrity of any Information used in the preparation of this Valuation Report, and assumes no responsibility regarding the accuracy, integrity or completeness of such Information. Should any of the assumptions related above not be confirmed, or if anyhow, the Information proves incorrect, incomplete or inaccurate, our conclusions might differ materially
- ▶ The preparation of a financial analysis is a complex process which involves several definitions related to the more appropriate and relevant financial analysis methodologies as well as to the application of such methodologies. We reached a final conclusion based on the results of the analysis made, considered as a whole, and we did not reach conclusions based on, or related to, any of the factors or methods of our analysis taken separately. Consequently, we believe our analysis must be considered as a whole and that any selection of parts of our analysis and specific factors, without considering our analysis and our conclusions as a whole, may result in an incomplete or incorrect understanding of the processes used for the purpose of our analyses and conclusions
- ▶ This Valuation Report only indicates an estimate, following our own criteria, of the value derived from the application of the valuation methodologies (i) discounted cash flow and (ii) comparable precedent transactions and comparable companies multiples, selected based on the level of information obtained. These methodologies are commonly used in financial valuations of companies, even in operations involving public companies, and does not analyze any other aspect or implication of the Transaction or any future contract or agreement reached in relation to the Transaction. We do not express any opinion related to the issuance price of the shares to be issued as a result of the Transaction or the value at which the shares of the Companies will be traded in the stock market at any time. Additionally, this Valuation Report is not and should not be used as (i) a fairness opinion regarding the Transaction or (ii) a recommendation regarding any aspect of the Transaction. In addition, this Valuation Report does not discuss the strategic and commercial merits of the Transaction or of the strategic decision that have led to the Transaction. The results presented in this Valuation Report relate solely to the Transaction and must not to be used or relied upon on the context of any transaction, current or future, regarding the Companies, the economic group they are part of, or the sector in which they operate
- ▶ Our Valuation Report is necessarily based on Information that was provided to us on this date and considering market, economic and other conditions as they present themselves and as they may be assessed as of this date. Although future events and other developments may affect the conclusions presented in this Valuation Report, we do not have any obligation to update, review, rectify or revoke this Valuation Report, in whole or in part, as a result of any future development or for any reason whatsoever
- ▶ This Valuation Report is exclusively addressed to Braskem and it is not intended to the commercial decision of the Companies in doing the Transaction nor as a recommendation to any shareholder or member of the board of directors of the Companies on how to act or/and vote in any matter related to the Transaction. Each shareholder should take their own conclusions in respect to the convenience and acceptance of the Transaction
- ▶ Our analyses does not differentiate classes or types of shares of each Companies, when and if applicable, and does not include operating, fiscal or any other nature of benefits or losses, including any eventual goodwill, or any synergy, incremental value and/or costs, in case they exist, resulting from the conclusion of the Transaction, should it occur, or any other operation. The valuation also does not take into consideration eventual operating and financial benefits or losses that may occur after the conclusion of the Transaction as a result of commercial changes in the existing businesses

Introduction

Important Notice

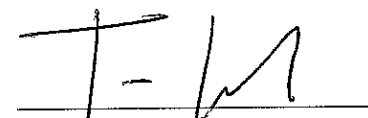

- ▶ Braskem and its management did not (i) interfere with, limit or difficult, in any manner whatsoever, our access, utilization or knowledge of the information, documents or methodologies relevant to the quality of the analysis presented in this Valuation Report, (ii) determine the methodologies used in the preparation of this Valuation Report, or (iii) restrict, in any manner whatsoever, our capacity to determine the conclusions presented in an independent manner in this Valuation Report
- ▶ We provided, from time to time, in the past, investment banking, financial and banking services in general and other financial services to the Companies, for which we have been remunerated, and we may in the future provide such services to the Companies, for which we expect to be remunerated. We and our affiliates provide a variety of financial services and other services related to securities, brokerage and investment banking. In the course of these activities, we may acquire, hold or sell, acting for our proprietary interest and for the interests of our clients, shares, debt instruments and other securities and financial instruments (including bank loans and other obligations) of the Companies, as well as provide investment banking services and other financial services to these Companies, their controllers or controlled companies. Additionally, the professionals involved with securities research and other divisions of the Bradesco Organization may base their analyses and publications on different operational and market assumptions, and in different analyses methodologies when compared to those employed in the preparation of this Valuation Report. Consequently, the research reports and other publication prepared by them may include results and conclusions different from those presented herein, considering that these analyses and the valuation reports were prepared by independent analysts without any connection with the professionals which participated in the preparation of this Valuation Report. We adopt policies and procedures to preserve the independence of our securities analysts, which may have different perceptions than those of our investment banking department. We also adopt policies and procedures to preserve the independence between our investment banking department and the other areas and departments of Bradesco BBI and other companies of the Bradesco Organization including, but not limited to, the asset management department, proprietary stocks, debt instruments, securities and other financial instruments trading desks
- ▶ We did not provide accounting, auditing, legal, tax or fiscal services related to this Valuation Report
- ▶ This Valuation Report was prepared in Portuguese and English, but the Portuguese version shall always prevail. Bradesco BBI does not assume any obligation and/or responsibility for updating, revising, or reassuring the result of this Valuation Report based on circumstances, development and/or events occurring after the date of its completion
- ▶ The financial calculations presented in this Valuation Report might not always lead to precise results as a consequence of rounded numbers

I. Executive Summary

Executive Summary

Valuation Report Considerations

- ▶ Braskem, Petrobras S.A. (“Petrobras”), Petrobras Química S.A. (“Petroquisa”) and Odebrecht S.A. (“Odebrecht”) signed an agreement in 2007 to consolidate the Brazilian chemical industry by integrating part of their petrochemical assets into Braskem, the following assets of Petrobras and Petroquisa composed the agreement: Companhia Petroquímica do Sul (“Copesul”), quantiQ, Ipiranga Petroquímica (“IPQ”), Petroquímica Paulínia (“PPSA”) and Petroquímica Triunfo S.A. (“Triunfo”)
- ▶ The next step, in order to create a major national petrochemical player, would be the consolidation of Braskem’s shares directly and/or indirectly held by Petrobras and Odebrecht, combined with an increased in Braskem’s net worth, followed by the integration of its activities and subsequent acquisition by Braskem of the stake of 60% held by União de Indústrias Petroquímicas S.A. (“Unipar”) in Quattor by a public offering of 0.7% of Quattor Petroquímica and by the incorporation, by Braskem, of Quattor’s issued shares, regulated by the investment agreement signed in January 2010
- ▶ Due to the operational differences, the petrochemical assets consolidated into Braskem (“Operational Braskem”) and the commercial operation of wholesale distribution of chemicals developed by quantiQ will be valued separately; the sum of the values of Operational Braskem and quantiQ results in the value of Braskem
- ▶ For the same reason, the valuation of Quattor was performed using the sum of the following parts: (i) 100.0% of Quattor Química, (ii) 75.0% of RioPol, (iii) 99.3% of Quattor Petroquímica (iv) 33.3% of PIB and (v) 100.0% of Quattor Participações S.A. (as a parent company) - including Divisão Química (“Divisão Química”)
- ▶ The discounted cash flow methodology (“DCF”) was applied to value Operational Braskem and Quattor’s Subsidiaries; quantiQ, PIB and Divisão Química were valued using multiples of precedent transactions and/or comparable companies. The multiple used for this valuation methodology was Enterprise Value / EBITDA (“EBITDA Multiple”)
- ▶ The DCF allows the analysis of future operational results of Operational Braskem and Quattor’s Subsidiaries, and is the most appropriate methodology to determine the range of economic values for Operational Braskem and Quattor’s Subsidiaries. The DCF took into account the following items:
 - ▶ Operational forecasts prepared by Braskem
 - ▶ Explicit period of projection in nominal USD: 10 years
 - ▶ Macroeconomic projections from Brazil’s Central Bank Focus Report
 - ▶ USD nominal discount rate of 9.55% for Operational Braskem and 10.24% for Quattor’s Subsidiaries
 - ▶ Terminal value of Operational Braskem and Quattor’s Subsidiaries considering a zero real growth in perpetuity
 - ▶ Industry studies, including CMAI report with price projections of main petrochemicals products and raw materials commercialized by the Companies and market information about comparable companies
- ▶ In this report, Bradesco BBI presents the valuation of the existing operations of Braskem and Quattor, under the terms of CVM Instruction 319/99

Executive Summary

Summary of the Valuation

Free translation of the original
Valuation Report in Portuguese

- ▶ Braskem's enterprise value⁵ is in the range of R\$ 25,313 million and R\$ 27,979 million; considering the net debt and equivalents as of 09/30/2009, its equity value ("Equity Value") is in the range of R\$ 18,875 million e R\$ 20,862 million
- ▶ Quattor's enterprise value is in the range of R\$ 7,102 million and R\$ 7,858 million; considering the net debt and equivalents as of 09/30/2009, its equity value is in the range of R\$ 1,285 million and R\$ 1,420 million

Company	Valuation Methodology	WACC (USD nominal)	Enterprise Value (R\$ million) ²	Equity Value (R\$ million) ^{2,3}	# Shares ⁴ (in million)	Share Price (R\$)
Operational Braskem ¹	Discounted Cash Flow	9.55%	24,985 – 27,615	-	-	-
	EBITDA Multiple	-	328 – 364	-	-	-
	Sum of the Parts ⁵	-	25,313 – 27,979	18,875 – 20,862	519.4	36.34 – 40.17
	Sum of the Parts ⁶	-	7,102 – 7,858	1,285 – 1,420	238.7	-

Notes: (1) Does not include Braskem's stake in quantiQ

(2) Range based on a 5% above and below the valuation average point, except quantiQ (see page 30)

(3) Enterprise Value less net debt as of 09/30/2009 (see page 61 and 62)

(4) Information obtained from Braskem and Quattor financial results on 09/30/2009 (does not include treasury stocks)

(5) Operational Braskem and quantiQ

(6) Considers (i) 100.0% of Quattor Química's value, (ii) 75.0% of RioPol's value, (iii) 99.3% of Quattor Petroquímica's value, (iv) 33.3% of PIB's value and (v) 100.0% of Divisão Química's value

Executive Summary

Summary of Quattor 's Valuation

Free translation of the original
Valuation Report in Portuguese

Company	Valuation Methodology	WACC (USD nominal)	Enterprise Value (R\$ million) ¹	Equity Value (R\$ million) ¹
	Discounted Cash Flow	10.24%	1,792 – 1,981	368 – 407
	Discounted Cash Flow	10.24%	3,209 – 3,547	543 – 601
	Discounted Cash Flow	10.24%	2,458 – 2,716	1,892 – 2,091
 (33%)	EBITDA Multiple	-	34 – 40	22 – 28
Divisão Química	EBITDA Multiple	-	74 – 88	74 – 88
	Sum of the Parts ²	-	7,102 – 7,858	1,285 – 1,420 ³

Notes: (1) Considers 100% of the assets valued, except for PIB, for which 33.3% was considered. Range based on a 5% above and below the valuation average point, except for PIB and Divisão Química (see page 52)

(2) Considers (i) 100,0% of Quattor Química's value, (ii) 75,0% of RioPol's value, (iii) 99,3% of Quattor Petroquímica's value, (iv) 33,3% of PIB 's value and (v) 100,0% of Divisão Química's value

(3) Considers net debt as of 09/30/2009 of Quattor Participações Controladora S.A. (see page 62)

Bruno Boetger
Managing Director

Mr. Bruno Boetger joined Bradesco BBI in 2007 and is a managing director in BBI's Investment Banking, where he is responsible for the oil and gas, steel and mining and chemical sectors. Bruno has 13 years of Investment Banking experience, primarily in M&A. Between 2005 and 2006, Bruno was the head of the Latin America M&A group at Citigroup in New York. He was also an Investment Banker at Salomon Smith Barney. He has a BA in Business from Fundação Getúlio Vargas and MBA from Cornell University

Jaime Cardoso
Head of M&A

Mr. Jaime Cardoso joined Bradesco BBI in April 2008. Previously, he worked at Citigroup Global Markets Inc. since August 2000, where he was vice president and then director of M&A. He was responsible for the origination and execution of transactions in Latin America including Brazil. Coordinated advice to various industries and sectors, including industrials, consumer, retail, energy and telecommunications. He worked at Salomon Smith Barney, where he executed multiple transactions of M&A, IPO and structuring of debts. Other experiences include working as an economist at the IMF

Henrique Pinto Lima
Superintendent, M&A

Mr. Henrique Pinto Lima joined Bradesco BBI in May 2008 and is responsible for coordinating the execution of the M&A and Equities deals. Henrique has over 10 years experience in financial advisory services in mergers and acquisitions, capital markets and structuring of debt and has worked at Bank of America, BankBoston and Stratus Investimentos. Displays extensive experience of advising in different industries and sectors, including food and beverage, chemical and petrochemical, energy and finance. Graduated in Business Administration from Fundação Armando Alvares Penteado in Sao Paulo

Daniel Ferraz
Associate

Mr. Daniel Ferraz joined Bradesco since 2002, having worked in the Corporate Banking and Project Finance groups until 2007, when he joined Bradesco BBI. Here he holds the position of associate, acting in the execution of operations of M&A and equities, mainly. Participated in various transactions, mainly in the energy, transport, real estate and food sectors. He holds a degree in mechanical engineering at the University of Sao Paulo, post graduate at Fundação Getúlio Vargas and an MBA at Columbia University in New York

Under the terms of CVM Instruction N° 319 as of December 3rd, 1999, Bradesco BBI makes the following statements:

- ▶ We do not hold or have under management any kind of participation in the Companies
- ▶ We do not hold any direct or indirect interest in the Companies or in the Transaction that may constitute a conflict of interest or that reduces our independence in preparing this Valuation Report
- ▶ The controlling shareholders or the management of the Companies did not interfere with, limit or difficult, in any manner whatsoever, our access, utilization or knowledge of working information, documents or methodologies that were relevant to the quality of the respective conclusions
- ▶ The internal process of Bradesco BBI to approve a valuation report involves the following steps:
 - (i) discussion among the members of the team involved in the Transaction over the methodology and assumptions to be adopted in the valuation of the Companies
 - (ii) subsequently, after the preparation of the report and revision by the team involved in the Transaction, it is submitted to an internal committee for a revision and approval; this committee is formed by at least two investment bank directors and one representative of Bradesco BBI's legal department

III. Description of the Companies

Description of the Companies - Braskem

Braskem S.A.

Free translation of the original
Valuation Report in Portuguese

Overview

- ▶ Braskem is the leading Latin American producer in the thermoplastic resin market and the third largest petrochemical company in the Americas. Its production capacity is approximately 11 million tons per year across 18 industrial complexes
- ▶ The Company's operations are divided into three main units:
 - ▶ Basic Petrochemicals: produces a wide array of basic or first generation petrochemical products, mainly ethylene, propylene and aromatics
 - ▶ Polymers: production of PE, PP, EVA, HHDPE, PVC, Chlorine, Caustic Soda and EDC
 - ▶ Development of International Businesses: responsible for Braskem's internationalization projects

Description of the Companies – Quattor

Polibutenos S.A. Indústrias Químicas

Free translation of the original
Valuation Report in Portuguese

Overview

- ▶ PIB is the result of an association of equal parts from Unipar, PQU, which also composed Quattor Química SA, and Chevron Oronite Brasil Ltda.. It started its operation in January/89
- ▶ PIB was initially designed to produce only two types of polybutenes - PIB 24 and PIB 32, using technology from Chevron USAA
- ▶ Currently it produces around 18,000 tons / year of more than 20 types of polybutenes
- ▶ Quattor owns indirectly 33.3% of PIB

V. Braskem's Valuation

Sales Volume¹ (in thousand tons)

Price Assumptions

- ▶ Domestic Market:
 - ▶ Polyolefins, PVC and Soda: based on CMAI's projected data for each product in the international market, adjusted by the historical performance of the domestic market, taking into account factors such as freight, insurance, service margins among others
 - ▶ Vinyls (excludes PVC and Soda) and Basic Petrochemicals: Considers each product's price in accordance to CMAI's projected data for the international market, adjusted by local prices, which were based on Braskem's historical prices
- ▶ External market: based on CMAI's projected data, adjusted by the historical correlation between Braskem's prices in the external market and the effective prices in the international market

Assumptions

- ▶ Capacity expansions of 200 thousand tons/year of PVC and of 204 thousand tons/year of green Ethylene were considered
- ▶ Domestic Market:
 - ▶ Polyolefins, PVC and Soda: projected sales volume based on the elasticity between the demand growth for resins and national GDP growth (historical average)
 - ▶ Vinyls (excludes PVC and Soda) and Basic Products: maintenance of the volume sold (historical average), considering the installed capacity and its utilization rate
- ▶ External Market: difference between the production and volume sold in the domestic market, if any

Net Revenue, COGS and EBITDA

Free translation of the original
Valuation Report in Portuguese

Net Revenue¹ (R\$ million)

COGS ^{1,2} (R\$ million)

EBITDA¹ (R\$ million) and EBITDA Margin (%)

Assumptions

- ▶ Naphtha's average price, Braskem's main raw material, was calculated based on CMAI's projected data in the international market, adjusted by the historical relation between the price paid by Braskem and the effective average price in the international market
- ▶ Other production costs were projected based on Braskem's historical data
- ▶ Sales expenses calculated as a percentage of the net revenue and based on Braskem's historical data
- ▶ General and administrative expenses linked to the CPI

VI. RioPol's Valuation

Sales Volume (in thousand tons)

Assumptions

- ▶ Capacity expansions were not considered
- ▶ Domestic Market: projected sales volume based on the elasticity between the demand growth for resins and national GDP growth (historical average)
- ▶ External Market: difference between the production and the volume sold in the domestic market, if any

Price Assumptions

- ▶ Domestic Market: based on the CMAI's projected data for each product in the international market, adjusted by the historical performance of the domestic market, taking into account factors such as freight, insurance, service margins among others
- ▶ External market: based on CMAI's projected data, adjusted by the historical correlation between RioPol's prices in the external market and the effective prices in the international market

RioPol's Valuation

Net Revenue, COGS and EBITDA

Free translation of the original
Valuation Report in Portuguese

Net Revenue (R\$ million)

COGS ¹ (R\$ million)

EBITDA (R\$ million) and EBITDA Margin (%)

Assumptions

- ▶ Average price of ethane and propane, RioPol's main inputs, were calculated based on CMAI's projected data in the international market, adjusted by the historical relation between the effective price paid by RioPol and the effective average price in the international market
- ▶ Other production costs were projected based on RioPol's historical data
- ▶ Sales expenses calculated as a percentage of the net revenue and based on RioPol's historical data
- ▶ General and administrative expenses linked to the CPI

Notes: (1) Does not include depreciation

Equity Value	368	388	407

Notes: (1) Exchange ratio of R\$ 1.77 per dollar on 09/30/09

(2) Exchange rate of R\$ 1.78 for the average projected dollar of 2010 (see page 23)

VII. Quattor Química's Valuation

Quattor Química's Valuation

Sales Volume and Assumptions

Sales Volume (in thousand tons)

Assumptions

- ▶ Capacity expansions were not considered
- ▶ Increase in the average capacity utilization of 75.0% in 2010 to 96.0% from 2011 onwards considered
- ▶ Domestic Market: projected sales volume based on the elasticity between the demand growth for resins and national GDP growth (historical average)
- ▶ External Market: difference between the production and volume sold in the domestic market, if any

Price Assumptions

- ▶ Domestic Market: based on the CMAI's projected data for each product in the international market, adjusted by the historical performance of the domestic market, taking into account factors such as freight, insurance, service margins among others
- ▶ External market: based on CMAI's projected data, adjusted by the historical correlation between Quattor Química's prices in the external market and the effective prices in the international market

Quattor Química's Valuation

Net Revenue, COGS and EBITDA

Free translation of the original
Valuation Report in Portuguese

Net Revenue (R\$ million)

COGS¹ (R\$ million)

EBITDA (R\$ million) and EBITDA Margin (%)

Assumptions

- ▶ Nafta's average price, Quattor Química's main raw material, was calculated based on CMAI's projected data in the international market, adjusted by the historical relation between the price paid by Quattor Química and the effective average price in the international market
- ▶ Other production costs were projected based on Quattor Química's historical data
- ▶ Sales expenses calculated as a percentage of the net revenue and based on Quattor Química's historical data
- ▶ General and administrative expenses linked to the CPI

Notes: (1) Does not include depreciation

Detailed calculation of the FCF (USD million)

IX. Quattor's Valuation

Definition of the Discount Rate Used in the Valuation of Quattor's Subsidiaries

WACC Calculation

WACC		Comments
Risk Free Rate - Rf	3.50%	Equals the average yield of the US Treasury 10 years bond between 07/19/2009 – 01/19/2010
Adjusted Beta - β	1.78	Betas for comparable companies were delevered, resulting in an unlevered beta of 0.89, then relevered based on the target capital structure
USA - Market Risk Premium (%) - MRP	5.5%	Average annual spread between the S&P 500 and US T-Bond (last 55 years)
Brazilian Country Risk - Z	2.27%	Equal to the average of the Brazilian Country Risk premium based on Emerging Market Bond Index between 07/19/2009 - 01/19/2010
Cost of Equity = Ke	15.6%	= Risk Free Rate + (Beta x USA - Mkt Risk Premium) + Country Risk
Cost of Debt in USD	10.05%	Estimated cost in dollars for the Company's long-term debt
Effective Tax Rate	33.41%	Considers the credits and fiscal benefits for the IR up to 2019 and CSLL of 9.00%
Nominal Cost of Debt = Kd X (1 - T)	6.7%	= Cost of Debt Net of IR/CS
Equity (E)	40.00%	Target Structure
Debt (D)	60.00%	
Nominal WACC in USD	10.24%	= (E x Ke) + (D x (Kd x (1 - T)))

VII. Appendix

I. Glossary

Term	Definition
Beta; β	Measures the part of the asset's statistical variance that cannot be mitigated by the diversification provided by the portfolio of many risky assets, because it is correlated with the return of the other assets that are in the portfolio. Beta can be estimated for individual companies using regression analysis against a stock market index
Bradesco	Banco Bradesco S.A.
CAPEX	Capital Expenditure
CAPM	Capital Asset Pricing Model: The model takes into account the asset's sensitivity to non-diversifiable risk (beta), as well as the expected return of the market and the expected return of a theoretical risk-free asset
CMAI	Chemical Market Associates , Inc., one of the main consulting firms specialized in the global petrochemical sector
Country Risk; Z	It is the premium required by investors for the additional risk of investing in Brazilian assets instead of investing in a risk free asset
CPI	Consumer Price Index
CSLL	Net income social contribution
DCF	Discounted Cash Flow
DEPEC Bradesco	Bradesco Economic Research Department
EBIT	Earnings Before Interest and Taxes

Glossary (Cont.)

Used Terms

Term	Definition
EBITDA	Earnings Before Interest, Tax, Depreciation and Amortization
EMBI	Emerging Markets Bond Index tracks total returns for traded external debt instruments in the emerging markets
Equity	Shareholders' Equity
Equity Value	Equity Value
EVA	Ethyl Vinyl Acetate
FCF	Free Cash Flow
Enterprise Value or EV	Enterprise Value
HDPE	High Density Polyethylene
IR	Income Tax
LDPE	Low Density Polyethylene
LLDPE	Linear Low Density Polyethylene

Glossary (Cont.)

Used Terms

Term	Definition
MDPE	Medium Density Polyethylene
MRP	Market Risk Premium: the risk premium can be the expected rate of return above the risk-free interest rate
Net Cash	Short-Term Cash and Cash Equivalents with high liquidity
Net Debt	Debt minus current cash and cash equivalents
NOPLAT	Net Operating Profit Less Adjusted Taxes
PE	Polyethylene
PP	Polypropylene
Risk Free Rate	The interest rate that is assumed can be obtained by investing in financial instruments with no default risk. The US Treasury bills are usually used as risk free assets
S&P500	The S&P500 is a value weighted index published since 1957 of the prices of 500 large cap common stocks actively traded in the United States. The stocks included in the S&P500 are those of large publicly held companies that trade on either of the two largest American stock markets, the New York Stock Exchange and NASDAQ
USD; Dollar	US Dollar
WACC	Weighted Average Cost of Capital
Yield	Financial return of a security over a certain period
